

Amazing Japanese Water Cure

DRINK WATER ON EMPTY STOMACH

It is popular in Japan today to drink water immediately after waking up every morning. Furthermore, scientific tests have proven its value. We publish below a description of use of water for our readers. For old and serious diseases as well as modern illnesses the water treatment had been found successful by a Japanese medical society as a 100% cure for the following diseases:

Headache, body ache, heart system, arthritis, fast heart beat, epilepsy, excess fatness, bronchitis asthma, TB, meningitis, kidney and urine diseases, vomiting, gastritis, diarrhea, piles, diabetes, constipation, all eye diseases, womb, cancer and menstrual disorders, ear nose and throat diseases.

METHOD OF TREATMENT

1. As you wake up in the morning before brushing teeth, drink 4 x 160ml glasses of water
2. Brush and clean the mouth but do not eat or drink anything for 45 minutes
3. After 45 minutes you may eat and drink as normal..
4. After 15 minutes of breakfast, lunch and dinner do not eat or drink anything for 2 hours
5. Those who are old or sick and are unable to drink 4 glasses of water at the beginning may commence by taking little water and gradually increase it to 4 glasses per day.
6. According to the Japanese Medical Society, the above method of treatment will cure diseases of the sick and promote a healthy life

The following list gives the number of days of treatment required to cure/control/reduce main diseases:

- High Blood Pressure - 30 days
- Gastric - 10 days
- Diabetes - 30 days
- Constipation - 10 days
- Cancer - 180 days
- TB - 90 days
- Arthritis patients should follow the above treatment only for 3 days in the 1st week, and from 2nd week onwards - daily

This treatment method has no side effects, however at the commencement of treatment you may have to urinate a few times.

The Japanese Medical Society recommends making this procedure an ongoing and routine part of our daily life.

They say: "Drink Water and Stay healthy and Active!"

This makes sense ... the Chinese and Japanese drink hot tea with their meals, not cold water. Maybe it is time we adopt their drinking habit while eating! Nothing to lose, everything to gain...

For those who like to drink cold water, this article is applicable to you.

It is nice to have a cup of cold drink after a meal. However, the cold water will solidify the oily stuff that you have just consumed. It will slow down the digestion.

Once this "sludge" reacts with the acid, it will break down and be absorbed by the intestine faster than the solid food. It will line the intestine. Very soon, this will turn into fats and lead to cancer. It is best to drink hot soup or warm water after a meal.
